

LI-TIAN LIGHTING

Brighten spaces evenly, without glare

A great performing LED light for general purpose and security areas that fits your budget.

Rugged cast-aluminum, corrosion-resistant housing with polyester powder paint for lasting durability. LED lamp heads are thermally isolated from the driver that is located in the rear housing, promoting a long service life. Lenses are sealed to keep out moisture, dirt and bugs. LEDs maintain 70% of light output at 50,000 hours of service life.

The refractive lens design spreads the light evenly, so you can brighten those outdoor spaces without glare.

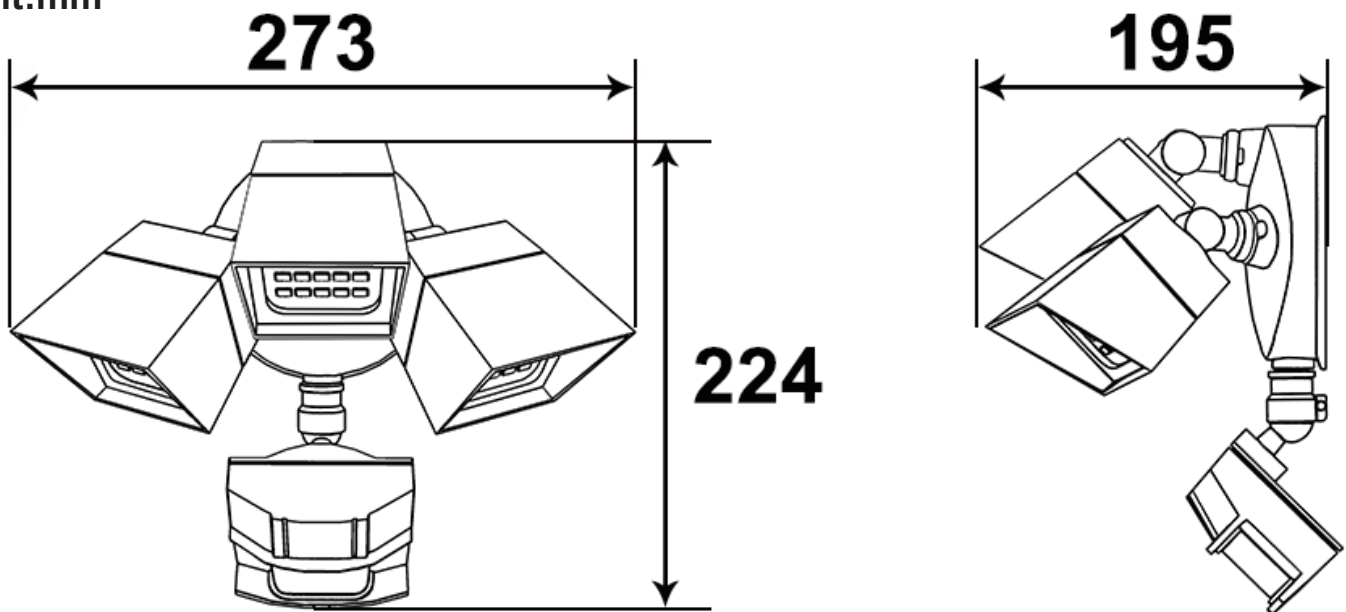

Outdoor Security LED

- ETL, cETL listed
